

We are here  
to facilitate in the  
reunification of  
our community  
on this planet.

JOIN US IN  
ITS CREATION

## THE GOAL IS GLOBAL HUMAN FULFILLMENT

#Moneyless and #Coercionless  
societal systems can be built with  
our community-based societal  
specification standards

JOIN IN, THIS IS WHAT WE CAN ACCOMPLISH  
TOGETHER, THROUGH  
PROJECT COORDINATION

Coordinating a  
free (moneyless) access-based lifestyle

Societal Engineering

Our common heritage forms an  
Integrated Habitat Service System

## Project Auravana

one earth  
one design

auravana.org

A new context for our current  
socio-technical reality.

*All goods and services can be made available without the use of money, credit, barter, debt, or servitude of any kind.*

### Money free cities (moneyless habitats)

The Auravana Project societal standards describe the concept and operation of a society that does not use money (i.e., does not have a "market").

### Coercion free cities (Stateless habitats)

The Project's societal publications describe the concept and operation of a society that does not use coercion, power-over-others, or punishment (i.e., does not have a "State"). Is entirely transparent and openly organized.

### Global human need fulfillment

The Project's publications explain how cities (habitats) may be constructed to meet the life, technology, and exploratory support needs of the population.

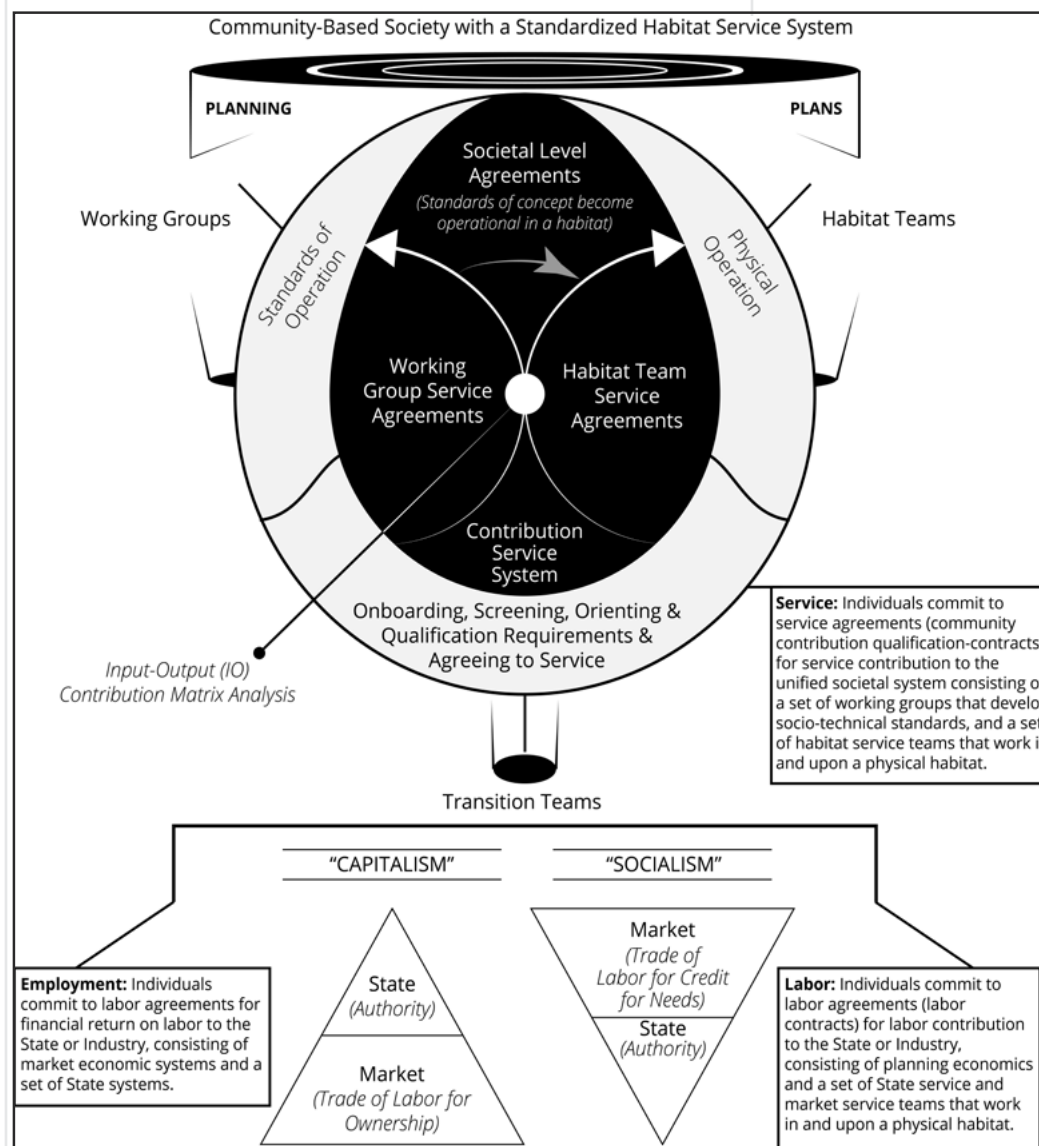

### Economic equity

The Project's publications explain how economic equity is achievable through unified planning, information systems development, and economic calculation.

### Common heritage

The Project's publications explain how resources and societal services are the common heritage of all of the Earths inhabitants.

*Auravana standards are a solution to the problems of poverty and economic inequality.*

### Project Proposal

- 1) A unified model for global human fulfillment.
- 2) A socio-technical standard for society.
- 3) A socio-economic information system.
- 4) A specification standard to be used in the planning, duplication, and actualized operation of community.

There are plenty of resources on the planet to provide everyone with a high quality-of-life. Currently, society configures those resources very poorly. We need a community-type society to configure the resources differently. Presently, capitalism arranges resources for the benefit of some over others. It is possible to create a type of society that configures planetary resources for everyone's highest benefit. A high quality-of-life means that everyone has life, technology, and exploratory needs met (given the best available) without coercion.
